# What Makes Our Gold Different?

☆ CERTIFIED EXCELLENCE

## Not a Plating

Our process fuses 18K gold onto titanium — creating a hard, permanent bond. Unlike liquid gold baths that chip and fade with friction, our coating endures for life.

## Lab Approved

Every piece passes a rigorous saline chamber test simulating years of corrosion, friction, and chemical exposure. Results are certified and delivered with your jewelry.

## Lifetime Warranty

We stand behind every piece unconditionally. Our lifetime guarantee is not a marketing claim — it is a written, laboratory-certified commitment to quality.

## Identical to Gold

Externally, our Oro Laminado is indistinguishable from solid 18K Italian gold — same color, same shine, same texture. The difference is in the value you receive.

# Oro Laminado — Frequently Asked Questions

## Your Top Questions, Answered

We believe you deserve complete transparency before you invest in jewelry. Here are honest, detailed answers to the most common questions about our Oro Laminado technology.

- **Is it the same as real gold?** Externally yes — same 18K color, brilliance, and Italian texture.
- **Can it be pawned?** As a jewel yes, but not as solid gold since it is not solid through.
- **Is it a bath?** No. Baths are liquid and fall off. Our coating is a hard titanium-fused layer.
- **Does it peel?** You can polish it — just avoid sandpaper, which would damage the gold sheet.
- **Does it resist the sea?** Yes — saltwater, pools, lotions, sweat, and acids are no match for it.

# Resistant to Everything Life Throws at It

Our Oro Laminado is engineered for real life. Whether you are at the beach, the gym, or a black-tie event, your jewelry maintains its radiance without compromise.

## Lotions & Perfumes

Daily skincare routines and fragrances will not dull or damage the gold layer — wear your favorite scent freely.

## Sweat

Workouts and active lifestyles are no problem. Our titanium-fused finish resists the acids found in perspiration.

## Pools & Chlorine

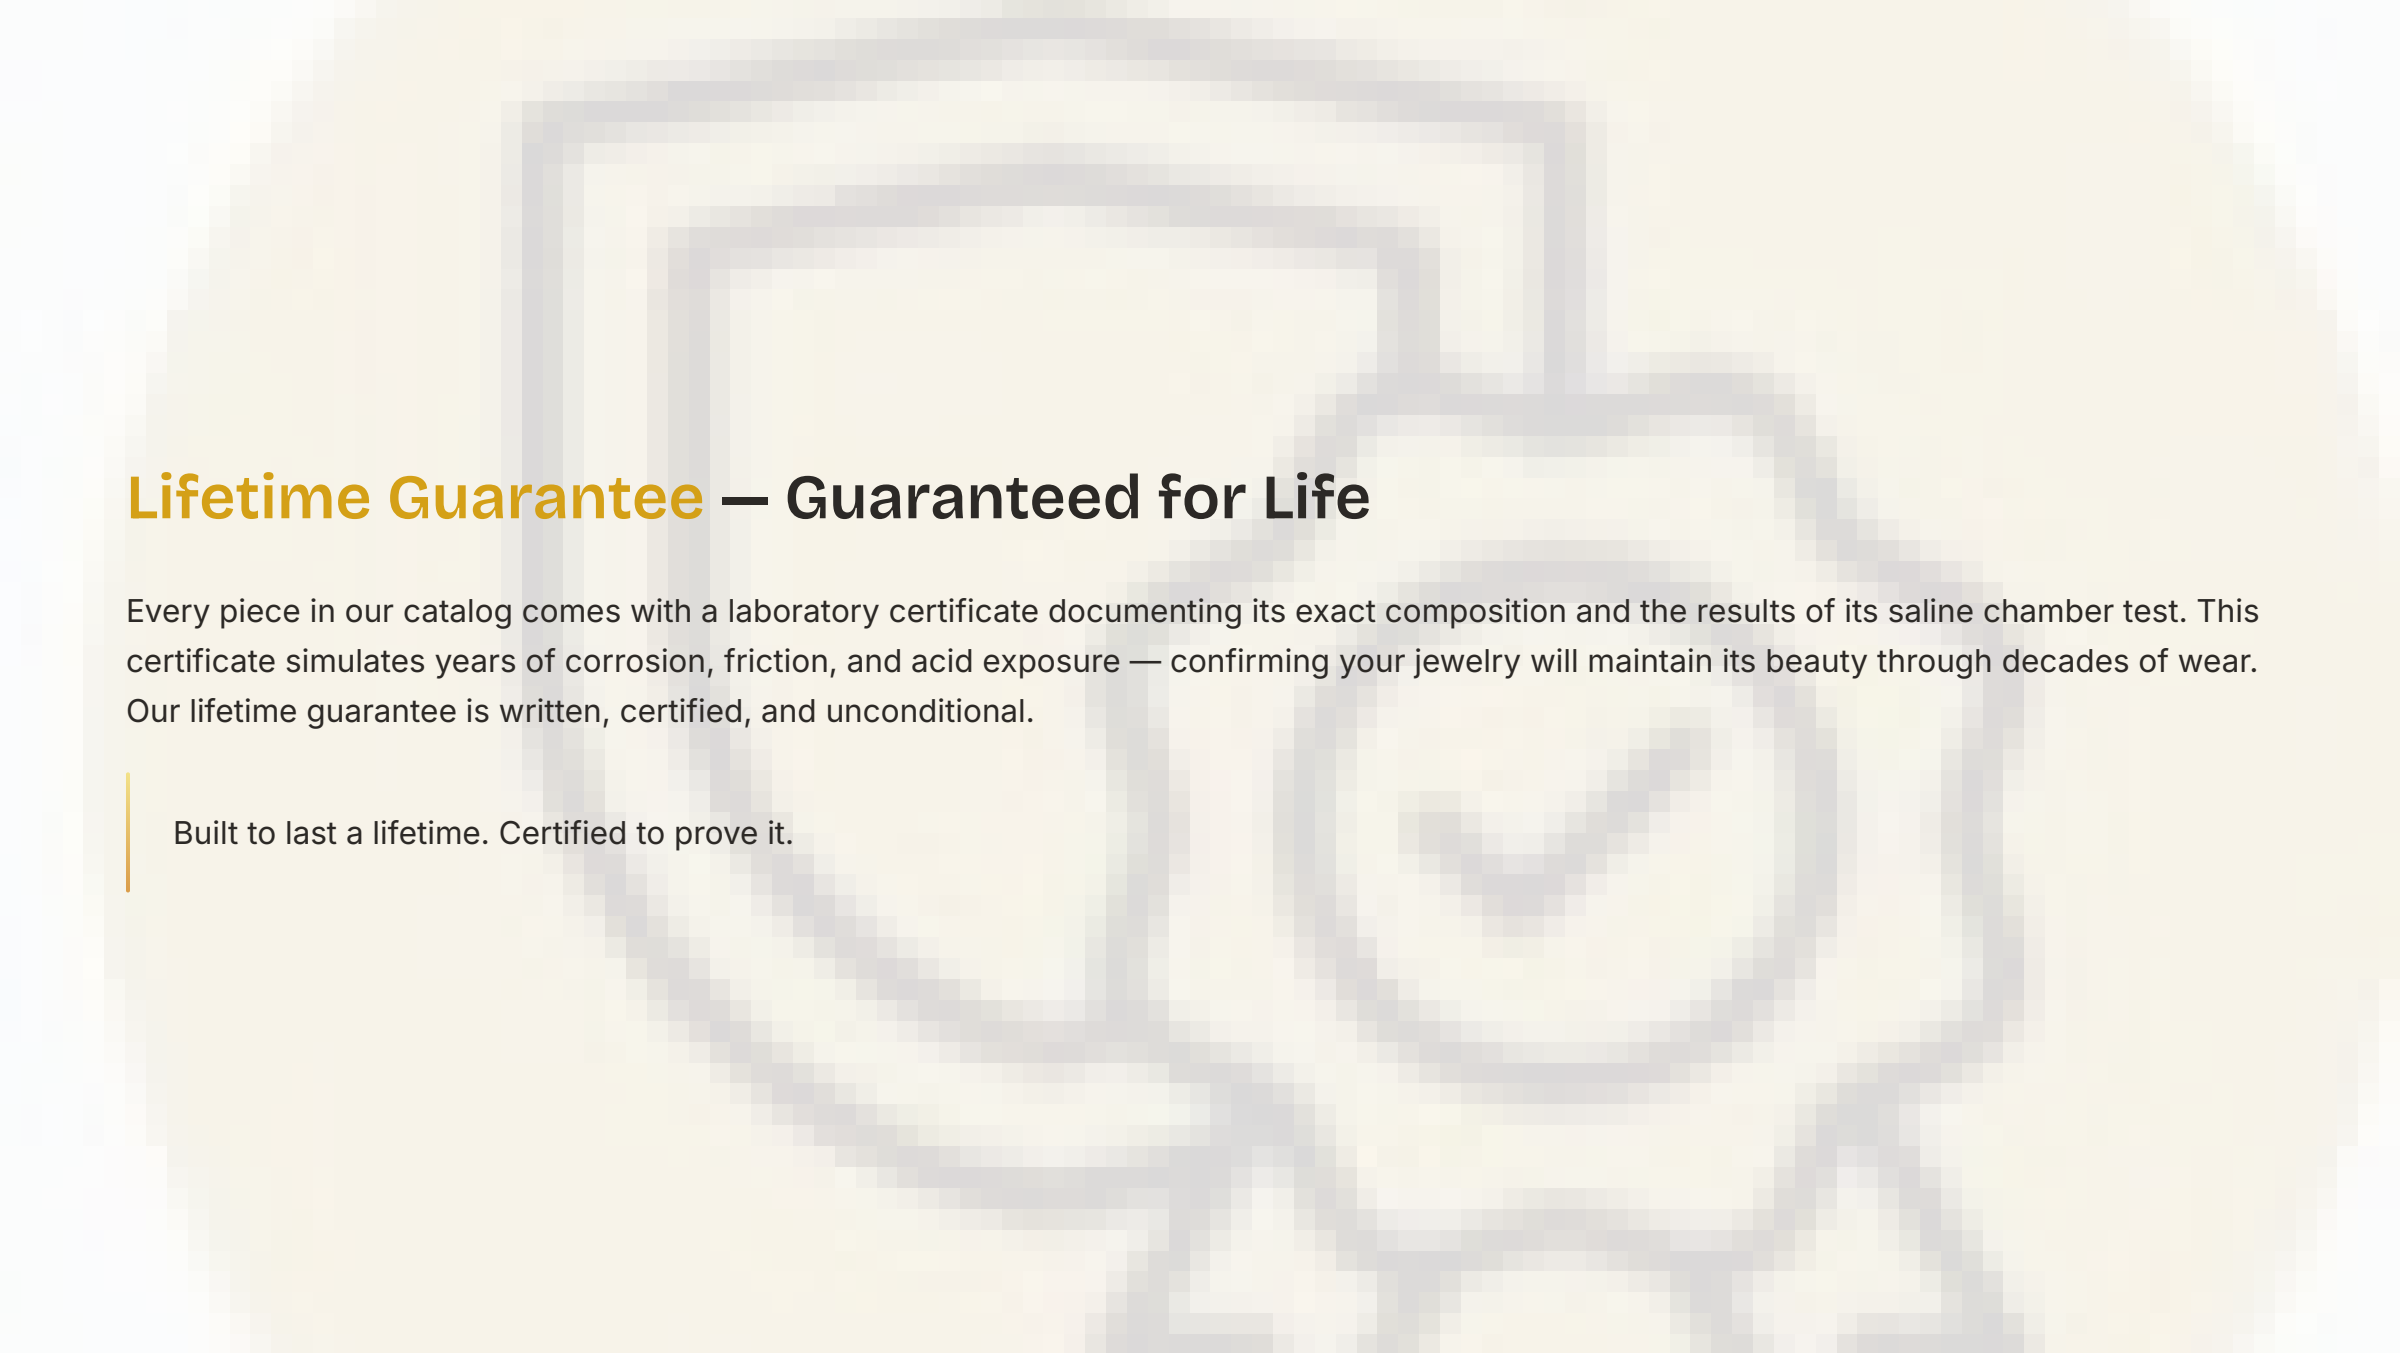

Jump in without hesitation. Chlorinated water will not corrode or discolor our certified gold plating.

## Saltwater & Sea

The saline chamber test confirms our jewelry withstands prolonged saltwater exposure — perfect for coastal lifestyles.

## Lifetime Guarantee — Guaranteed for Life

Every piece in our catalog comes with a laboratory certificate documenting its exact composition and the results of its saline chamber test. This certificate simulates years of corrosion, friction, and acid exposure — confirming your jewelry will maintain its beauty through decades of wear. Our lifetime guarantee is written, certified, and unconditional.

Built to last a lifetime. Certified to prove it.

ESMERALDAS COLOMBIA

# Colombian Emeralds

Colombia is the world's premier source of emeralds — responsible for over 70% of global production — and our collection proudly features these extraordinary gemstones. Colombian emeralds are renowned for their unparalleled depth of color: a rich, saturated green with a warm, slightly yellowish hue that is utterly distinct from stones mined elsewhere in the world. This distinctive color — known in the trade as "Colombian green" — is the result of trace amounts of chromium and vanadium found uniquely in the Boyacá region's geological formations.

You will find Colombian emeralds featured throughout our catalog — in the Panal ring, the Cruz con Gemas Verdes, the Tennis necklace, the Jade pendant, the Luxor bracelet, the Centurión pulso, and more. When you choose a piece with Colombian emeralds, you are wearing a fragment of one of the world's most celebrated natural treasures, elevated by 18K gold.
